Custom Surgical®

Record and Broadcast Microscopy Imaging

We produce optical systems and software that digitize your medical microscope or slit lamp and allow for seamless capturing, storing, and broadcasting of high-quality medical imaging - **without blocking the binoculars.**

MicroREC

Custom Surgical®

Digitize your microscope

MicroREC allows you to attach any smartphone to a microscope to slit lamp and start capturing medical imagery instantly.

Works with 90% microscopes and slit lamps

Compatible with any smartphone

Produced in Germany

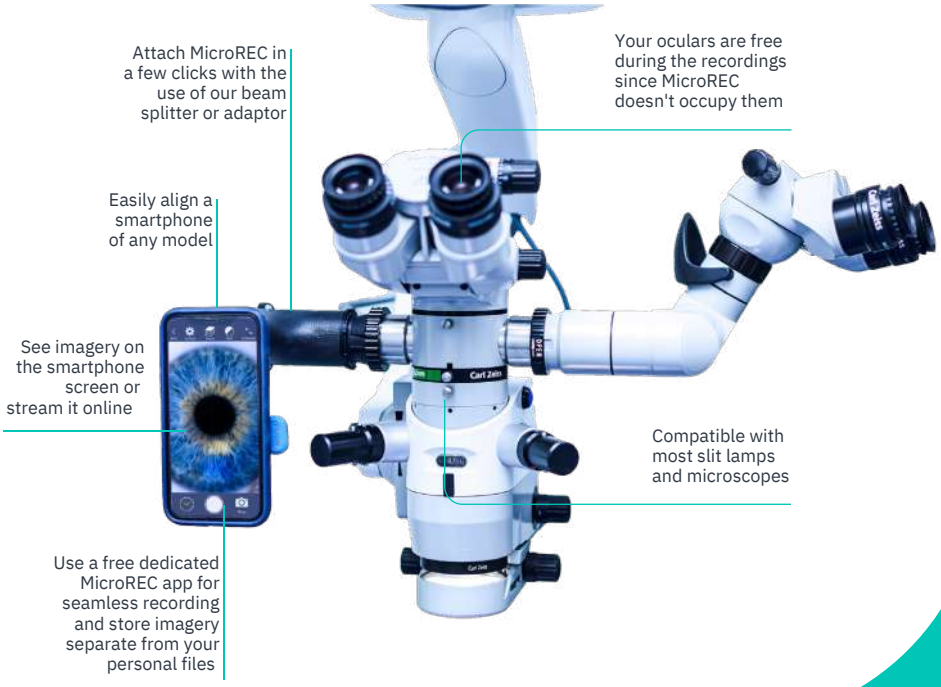

2-year warranty

Worldwide shipping & support

Broadcast your procedure on other screens

MicroREC

Custom Surgical®

What does it consist of?

MicroREC Kit

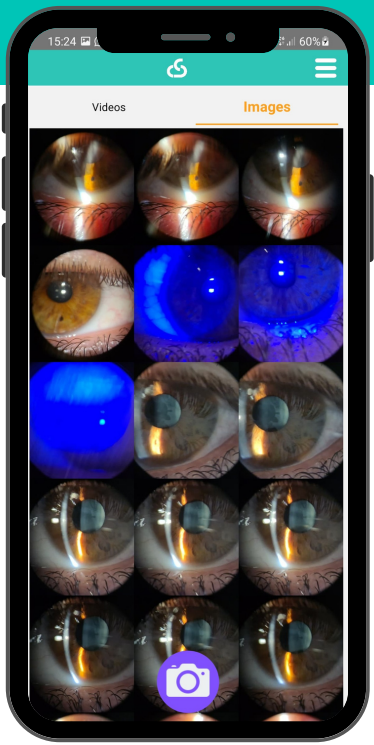

MicroREC Kit with BeamSplitter

The free MicroREC app for medical imagery

Capture microscopy and slit lamp imagery with ease. The MicroREC app allows you to adjust camera settings to operating room conditions, shoot and store content in a dedicated gallery separately from your personal files, broadcast it on social media or to screens. It works with any microscopy recording system and even if you just shoot the content manually.

MicroREC APP

Available on IOS and Android
